

Your child will be expected to know the words below. They are known as "sight words" because many of the words cannot be sounded out. Your child will also learn new words from his or her reading story each week.

THIRD GRADE SIGHT WORDS

about	hold	seven
better	hot	shall
bring	hurt	show
carry	if	six
clean	keep	small
cut	kind	start
done	laugh	ten
draw	light	today
drink	long	together
eight	much	try
fall	myself	warm
far	never	
full	only	
got	own	
grow	pick	

Third grade students will be learning more academic vocabulary. These are words that are specific to an area like science or social studies.

How Can You Help Your Child?

1. Read with your child every day. Read aloud to your child and ask him or her to read to you.
2. After you read a book together, ask your child questions like who, what, when, where, why and how about the text.
3. Talk about the meanings of new words your child sees or hears.
4. Practice sight words.
5. Visit the library often. Allow your child to pick books that interest him or her.
6. Practice basic multiplication facts with your child.
7. Make math meaningful by finding real-world math problems in your daily life, especially with fractions.
8. Ask questions that require mathematic thinking: estimation, greater/less than, basic multiplication problems.
9. Play math games with cards or dice to build counting and thinking skills. (Example: quickly multiply the numbers on 2 dice or 2 playing cards).
10. Have your child explain the relationship between numbers without counting. (Example: 147 is 100 more than 47 and 3 less than 50).
11. Review communication that comes home each night from your child's teacher.
12. Keep a box filled with school supplies at home. Important supplies to have on hand are: kid-friendly scissors, pencils, a pencil sharpener, erasers, crayons or colored pencils, glue stick and paper.

When school starts, if you have a concern about your child's progress or development, speak with your child's teacher.

A Guide for Families
